CASE STUDY #119: CARRIER SUPERIA R32 INVERTER

Completion: 2024

Location: Greece

Project Type: Residential

Application: Mini-Split

Contractor: Andreas & Dimitrios / Klima Link

Supplier Rep: Dimitrios Koutsintas / ARIES

"I am impressed and enthusiastic about using Python. It's very easy to install and performs like copper."

- Andreas Tsourektsidis

Challenges

- This was the first time the technicians worked with Python and weren't very familiar with the install process.

Solutions

- Python was exceptionally easy to work with because of its flexibility.
- Quality of the fittings are superior to others and were a pleasure to work with.

Benefits

- Pipe is lighter than copper and easier to work with.
- No swaging/flaring making for easy install.
- Pressure test proved Python system to be high quality.
