

The Next Evolution of Line Sets.

CASE STUDY #125: OCALA, FL

Completion: 2024
Location: Ocala, FL
Project Type: Residential
Application: Mini-Split
Contractor: Sun Kool Air Conditioning Inc.
Supplier: Johnstone Ware Group
Supplier Rep: Matt Vincent

*"I love how bendable and easy it is to handle."
- Don, Sun Kool Air Conditioning*

Challenges

- Long runs.
- Sharp metal throughout the attic.
- Tight turn at the soffit.

Solutions

- With a 300ft continuous length, our line set was able to complete the job in one piece with zero splicing.
- The jacket was tough and wasn't compromised by jagged metal throughout the attic.
- The malleable Python lines were able to navigate the tight turns without any kinking.

Benefits

- Lightweight
- Easy to manipulate
- Way better than copper on kinking.
