

CASE STUDY #104: PLAINFIELD, IN

Date of Project: October 6, 2023

Location: Plainfield, Indiana

Type of Build: Single Family

Contractor: Polleys Perfect Seasons

Supplier Rep: Top Marketing, Inc.

“ It was nice not having to flare copper. A great alternate to copper in mini split applications!”
-Zach Hansel, owner

The Challenges:

- Mini-split running to upstairs bonus room. Install had to be completed quickly.
- Pipe had to remain out of sight.

The Solutions:

- Python made for a very quick installation as opposed to copper.
- Able to follow roof peak to make the installation look great.
- Super easy at indoor connection.

The Benefits:

- Very quick to install.
- Everything seemed very tight and secure.
