

CASE STUDY #106: RIO GRANDE UNIVERSITY

Date of Project: March 2024

Location: Athens, Ohio

Type of Build: Multi Family

Contractor: Warner Comfort Systems

Supplier Rep: Duhart Company

„ (Python) takes an eight week "rough-in" down to five weeks. Almost 100% quicker installs!"

-Jason Warner, owner

The Challenges:

- Concerns with copper theft at the build site.
- Multiple bends requiring cutting and adding fittings with copper.
- Tim consuming job with 300 units.

The Solutions:

- No worries about copper theft with Python
- Python bends easily around corners, eliminating cutting and adding fittings.
- Cut three weeks off of the installation.

The Benefits:

- One of four current Python jobs underway.
- Getting better and quicker with every install.
