## **Python Accessory Connections**

Python Male (60xx series) and Female (61xx series) Compression Fittings are **ONLY** designed to connect directly to HVAC OEM equipment threaded flare valve connections.

Third party male and female threaded flare adaptors **CANNOT** be used to connect directly to Python Fittings. Python Male Flare Elbows (65xx series) are the **ONLY** approved threaded adaptors that can be connected to the Python Female (61xx series) Compression Fittings. Industry standard refrigeration flare nuts and copper flare connections **ARE** acceptable alternative connections to the Python Male Flare Fitting.

Python Female Flare Fittings (61xx series) are the **ONLY** Python fittings that can connect directly to a filter drier that has male flare threaded connection points. Python No Braze Fittings (66xx series) are **NOT** approved to be used to connect directly to braze on filter driers.
